The city of Brewer, and a city o known and appreciated on the busts of men; of absurdity.
His reference to the "S ceriag Com-

He appealed to the people last fall as against what he was pleased to term the Interference of these citizens and received a stinging ribuke at the polls. What has he done to lead the taxpayers to regard him with favor, or to place a premium upon his ideas of finance? It is only precessive to examine the tax receipts for the past year for an answer, and had it traded the tire until Feb. 21, 20, m., Bill, an act to establish a sorting been on Mattawamkerg zons to co-operation with the members of the City Government it is impossible to tell what the ultimate cost to the chy might have been. At any rate the people most emphatically vetoed a project which was carried through the Board of Aldermen by the casting vote of the Mayor, hence his real grievance must mecessarily be against the people as a whole rather than against individuals. The question of an extension of the

city's credit to the Bangor & Arcostook Company was fully discussed and unantmously promised by the City Government at the time of the lease of the B. & P. An extract from the lease is here

It was adopted by the easting vote of the chalrman" says the Mayor. Surely there is no trick about that. - The vote was a tle and was broken by the chairman, but had there been no occasion for the chairman to vote unless he so desired it nevertheless remains the fact that he was just as much entitled to vote in that meeting as any other mimber of the committee. Instead of the Mayor by the election of the ticket placed in nomination, by the delign es? The contention of the Mayor is not sustained by the facts.
